

.NET Core Microservices – True Ultimate Guide

Section 15 – Azure API Management – Cheat Sheet

Introduction to Azure API Management

Azure API Management is a service for creating, securing, and managing APIs, offering features like gateways, security, rate limiting, and analytics.

API Gateway

Route and expose APIs securely.

Security

Apply authentication, authorization.

Traffic Control

Implement Throttling, rate limiting and load balancing.

Others

Caching, Versioning, Logging, Monitoring etc.

Azure APIM - Policies
